### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: In the last line of claim 14, change "said self-outing switch" to read "said self-routing switch".

The following is an examiner's statement of reasons for allowance: Claims 1-6 are allowable for the inclusion of the limitations, when taken within the context of the claims as a whole, of "monitoring said outgoing transmission lines exclusively; communicating a fault indication to all of said incoming line cards if a fault condition is detected in at least one of said outgoing transmission lines; and updating a routing table at each of said incoming line cards according to the fault indication...". Claims 7-10 are allowable for the inclusion of the limitations, when taken within the context of the claims a whole, of "a plurality of outgoing line cards, connected to respective output ports of the self-routing switch, each outgoing line card receiving intra-node cells from the self-routing switch, converting the cells into a packet, monitoring the outgoing transmission line, and transmitting a fault indication to the incoming line cards if a fault condition is detected in said outgoing transmission line, each of said incoming line cards being responsive to the fault indication for updating said routing table...". Claims 11-14 are allowable for the inclusion of the limitations, when taken within the context of the claims as a whole, of "each of the outgoing line cards including: ...a monitoring circuit for
